BASSANO BREAD GETS HIGH SCORE

Product of Bassano Bakery Rated Higher Than Average in Tests Made by Chemist on Government Baking System

Summarizing the quality of Bassano bread as "excellent" at the conclusion of his test, H. R. Swanson, chemist of the Robt. Hood Mills Ltd., Calgary, submitted a very high report on the product of the Bassano Bakery.

J. Glorance, proprietor of the local bakery, is very pleased with the report.

The average of bread tested by the Robt. Hood Mills chemist during the month was 87 out of possible perfect score of 100. The Bassano bread scored 92.5 points.

The test was made according to the official method of the American Institute of Baking.

NEW SCHOOL TRUSTEE CHOSEN

L. Y. Birnie Fills Vacancy Left by Resignation of W. W. McFarlane

Only one nomination for school trustee of the Bassano school board was received last Monday when Returning Officer Jas. B. Donaldson held nomination open for one hour in the town hall.

The lone nominee was L. Y. Birnie, manager of the Imperial Hotel. He was declared elected by acclamation.

The vacancy in the school board was created by the resignation of W. W. McFarlane, who moved to Edmonton.

Mr. Birnie will complete the remaining portion of the term for which Mr. McFarlane was elected. This will expire Feb. 1934.

The local school now consists of W. Flanagan chairman, Jas. Johnston, J. H. Miller, Roy Smith, and L. Y. Birnie.

ROSEMARY NEWS

ROSEMARY, Sept. 20—Mr. and Mrs. R. Copeland and Gerald, of Calgary, spent Saturday and Sunday with friends here.

Miss Fletcher, teacher of the latter middle room, has been ill the past few days.

Mrs. R. Eastman, Pearl and Jean, and Mrs. J. Norton motored to Duchess Saturday.

A miscellaneous shower was given in honor of Mrs. A. Florence Sunday at the home of her mother, Mrs. White. The bride received many useful presents.

COUNTRESS NEWS

COUNTRESS, Sept. 20—Mrs. B. Benjamin arrived the first of the week. Mr. Benjamin will come later to take care of the Countess store October 1.

Mr. and Mrs. Gamble and Norman visited the girls in Calgary recently. Mrs. Miss Accompanied them home. Miss Lena Beringer visited relatives in Calgary recently.

PILFERED PLUMS PROVE COSTLY TO FARMER

The story comes from Brooks of a "fifty farmer charged with stealing plums from the fruit trees of the C.P.R. D.N.R. farm. The accused was given six months suspended sentence and ordered to pay the cost of the court.

The C.P.R. plum trees have been the object of a number of midnight raids, and the company was determined to put a stop to the pilfering.

Nice Crop Raised At Crowfoot By Mrs. Hefflebower

Wheat Graded No. 1 Hard, Weighted 65 pounds to the bushel, and Yielded 27 bushels an Acre.

Dry as it was, during the latter part of the growing season, a good crop of wheat was raised on the farm of Mrs. J. Hefflebower, near Crowfoot, this summer.

Her best yield was a half of Red wheat which was a little more than 27 bushels an acre and graded No. 1 hard, the highest grade given in the trade. It is a beautiful sample of wheat, and weighs 65 pounds to the bushel.

The balance of Mrs. Hefflebower's crop, which is not yet harvested, is yielding about 25 to 27 bushels an acre and weighs 63, 64, and 65 pounds to the bushel.

The Crowfoot district is an exceptionally fine wheat growing area and in good years bumper crops are raised. Through long years of experience the farmers have learned the best methods of cultivation, and even in years of a limited moisture supply fairly good results are obtained.

GEM NEWS

GEM, Sept. 21—Threshing has been delayed again for the third time owing to frequent rains.

A wild and severe windstorm with very little rain blew over Gem and district on Saturday and Sunday, filling ditches and canals with weeds.

All C. P. R. employees were kept busy all day on Monday.

W. Wade, E. Small, and P. Williamson were business visitors in Bassano on Tuesday.

Miss Helen Waltemath returned home recently from Saskatchewan, where she has enjoyed an extended holiday with numerous friends.

Mrs. McGinnis, who has been enjoying a holiday with Mrs. Hyrre, will return to Calgary this coming week-end.

Mr. and Mrs. Standen were Calgary visitors on Saturday.

Gene school on Friday, Sept. 30, no rumor says.

Wheat and the Imperial Six Cent Preference

The following article was issued from the publicity department of The Alberta Wheat Pool

An impression has been created in various parts of Alberta and in western Canada that the six cent bushel preference on Canadian, Australian, and Indian wheat in the British market, agreed upon by the economic conference of the British Commonwealth of Nations held at Ottawa, means that the market price of our wheat is to be automatically increased by the amount of that duty. In fact we are informed that some of our Alberta grain growers are holding back in marketing their wheat with the intention of obtaining the additional six cents.

Unfortunately these who anticipate an additional six cent bushel as a result of the agreement arrived at will, in all probability, be seriously disappointed. Indirectly it might be pointed out that at present exchange rates on British money, this preference amounts to five cents a bushel. The six cent preference hoped for from the preference is an increasing use of Canadian wheat in Great Britain with a resultant betterment to the British farmer. It is doubtful if even the most optimistic advocate of the wheat preference will go so far as to predict that the six cent preference will result in a direct result. It is entirely unlikely that any such benefit will be reflected directly back to the Canadian growers from the operation of the wheat preference, particularly in a year like the present when a large crop has been raised in Canada.

Supplies of wheat in Canada, including the 1932 crop, are sufficient to meet the total British requirements for the year two over. The most that may be anticipated in the way of export of Canadian wheat to Britain is 190,000 bushels, or a third of our average Canadian exportable surplus. Remember that the balance of our surplus is exported to other countries and the preference prevails only on the volume entering Britain. That situation alone precludes a general price increase from the preference.

While there has been a great deal of discussion regarding the agreement reached at the conference, it will only be when the fall rains set in that the British and Canadian parliaments that full particulars of the agreement will be known.

The Canadian parliament meets on October 6, and the British parliament also assembles a couple of weeks later, so it will not be much longer before the complete picture of what actually was achieved at the conference will be presented to the public.

Government has to accept the agreement and incorporate it into law. The best whatever beneficial effects are obtained from the agreement will not have a sudden reflection on wheat conditions but will be brought about gradually over a period of time. It is quite possible that the discouragement offered wheat producers in Argentina, Russia, and the United States by being put at a disadvantage in disposing of their surplus on the British market, which is the greatest wheat market in the world, will result in the decreasing of wheat acreage in the countries mentioned and particularly in the United States and Argentina.

It is reported that the basis of the agreement is that wheat shall be purchased at "world prices." It is not clear what this means. It may refer to prices as fixed by the principal world markets or prices prevailing in the British market. In any event, even in years comparatively short wheat crops in Canada and Australia, it is improbable that Empire wheat exporting countries will realize higher prices for that surplus of their wheat exports sold to Britain by the full advantage of the duty.

The difficulty of reflecting any cash advantage gained by the duty back to producers lies in the fact that the "world" interest in their grain is when it leaves Vancouver and ports at the end of the cable. Superior, the international wheat trade is now being largely in the hands of foreign interests; and also due to the condition mentioned previously that only a percentage of total exports will go to Britain. That percentage going elsewhere will be sold at world prices.

The British do not anticipate a material increase in wheat prices, if any at all, from the workings of the preferential tariff. Sir Arthur W. Holmes, who attended the British grain trade delegation at the Ottawa conference, said recently in Winnipeg: "It is asserted that a two shillings per quarter preferential tariff on wheat will raise the price of the quantity and price to the Canadian farmer. I cannot see my way to accept that dictum."

It might be mentioned that Australia was not greatly interested in the preferential tariff. In fact, Australia has made a very successful job of selling her last year's crop due to the low value of Australian money. The British pound is valued at over \$4.00 in Australia. The British pound is valued at around \$2.50 in Canada. This means that you who rail against the United States money being at a ten per cent premium over Canadian money should remember that the British money heavily discounts the British pound. On the other hand, the British pound severely discounts the Canadian pound and this has enabled Australia to undersell Canadian wheat in every market in the world. The result is today Australia has a bumper crop. She does not face the same marketing problem in regard to wheat as does Canada.

The United States wheat grower is similar yet a disadvantage when it comes to world wheat markets. The United States dollar is at such a high premium. Consequently United States wheat cannot export without a disadvantage and "hog domestic money" is being used to the disadvantage of the United States wheat farmer who has the solution to their problems in their own hands, but they won't apply it. If they cut their production of wheat they could raise world prices materially and their domestic price would be a healthy one. World prices are the basis of wheat. She does not face the same marketing problem in regard to wheat as does Canada.

HUSSAR NEWS

HUSSAR, Sept. 21—On Monday, after school, all the boys under 16 who could, went with the teaching staff, C. A. Weeks, C. Kirby, and D. Bell, at the school house to consider the formation of a troupe of boy scouts. It was decided to form a troupe of boy scouts. It was decided to form a troupe of boy scouts.

A heavy frost on Tuesday night seems to have cleared the air, and the weather seems more propitious for harvesting. The wind on Saturday blew down whole bunches of stalks, so the men are busy setting them up again, even though threshing cannot begin again for a few days.

Mr. and Mrs. McFarlane returned to Calgary because of the delay in work. Owing to the very busy season, it was decided to postpone the September meeting of the W. I. W. will meet in October at the home of Mrs. J. C. Lawson, western permitting.

Two "Hansen's" daughters, Anna and Christine, came down from Calgary on Thursday to visit their father, returning on Saturday.

Mr. and Mrs. A. M. Sanford, of Calgary, are in Bassano on Tuesday looking over the land with a view to opening a grocery store here. They may rent the bank building and the Macdonald house.

Mr. Burgeson and crew arrived here on Tuesday with a threshing party for work. There is a great deal of threshing left to do here.

Margaret Bell just received word that she passed history 4, giving her 8 passes in grade 12, and the high school room an average of 80 per cent passes.

High school at 11 a.m. and church services at 12. An honor roll has been instituted for all Sunday school students attending the church services, and there is a special talk for the young people, also the young folks are playing the children's hymns.

Mrs. R. Reeves and Peggy, and Hans Buchkmidt motored to Calgary on Tuesday.

The schools of the community are preparing for the school opening to be held here in October with a dance in the evening.

The boys are being made to enlarge the hockey rink, and work will be started on Saturday. Then the rink will be the official size.

A girl girl giving held their first meeting of the year on Wednesday evening with Margaret Bell. Election of officers was the chief matter of business.

MANY BIRDS BAGGED BY LOCAL HUNTERS

H. Holmes and L. Edwards Get Five Geese the First Day—Ducks Are in Fair Condition

Many local hunters, unimpaired by the late Thursday noon when the duck and goose hunting season opened.

Those who knew where ducks were to be found came back with good sized bags and reports of good hunting.

Harry Holmes and Larry Edwards had a great run of luck the first day when they bagged five big birds. The next day they brought down three more, and complained that they should have had twice that number.

RAIN CALLS HALT ON THRESHING

Only Four or Five Days Threshing Left in Neighborhood of Bassano—One-Third Inch Rain Falls

Rain early today morning brought a stop to threshing operations just when the farmers in this vicinity were winding up the season's work. There is only four or five days threshing left in this district.

The rainfall record, as given by the C.P.R. D.N.R., is as follows: Bassano District 44 inch, Coatsworth 44 inch, Coatsworth 44 inch, Coatsworth 44 inch.

While the rain appeared to be good, the rate of rain was so heavy that very little precipitation at Gem.

Threshing machines, and combines were at a standstill Monday, Tuesday, and Wednesday morning, so that farmers expected to start up again Wednesday afternoon. Cool and calm weather Monday and Tuesday, with an occasional drizzle, prevented the grain from drying out rapidly.

LIGHTS FAIL IN THE BNSV SHOPPING HOUR

Merchants and Customers Do Business by Candlelight When Power Slips Off Saturday Evening

Goods were wrapped up and cashed as changes were made in the country of Bassano's stores by the dim light of spattering candles last Saturday evening for half an hour when the electric power failed and the town was plunged in darkness.

P. Ubertino, Orpheum Theatre manager, was frantically busy when the lights failed in the middle of the talking picture performance. He had some difficulty in holding his audience while the lights failed and the lights were not in flames and the light brought on ended all over town.

People bumped into each other in the dark streets, and a strong wind blowing stirred up dust about added to the confusion.

Shoppers worried along with candles until the lights came on again about half an hour later.

Indian Is Victim Of Fatal Railway Accident at Cluny

Jim Wolf Leg, Indian, suffered fatal injuries in a recent accident at the Cluny railway crossing when the engine and train struck him as he was driving with a freight train.

The injured man was taken to the Blackfoot Indian Hospital where he was held for a few days. He was so badly injured they had to be shot.

It is thought Jim Wolf Leg did not know the approaching train because of the noise made by his wagon.

West May Get Rainy Cycle

Action of Glaciers Described by H. W. Allan in Calgary Address

Predicting that within another five or ten years a period of great rain will be experienced, H. W. Allan, prominent member of the Alpine Club of Canada, addressed the members at their Thursday meeting in Calgary.

Movements of the glaciers in the Canadian Rockies and the Selkirk range, was the subject on which Mr. Allan spoke. Measurements of the glaciers have shown that glaciers advanced for a period of from 35 to 60 years and then retreated during a similar period. Records in Canadian mountains, dated back only 45 years, during which time most of the glaciers had been receding at varying rates. Mr. Allan said: "It may be that in another five or ten years these glaciers will commence a cycle of retreat, when they will advance," the speaker declared.

CANADA HAS

A GREAT GOLFER

Bassano, veteran Arctic explorer, today returned from Greenland with the claim that he had found evidence of one of the missing links in the chain of evolution—a four-legged fish that walked ashore.

In winning the championship Sonerville has the distinction of being the first Canadian to capture the trophy, and the first invader in 21 years to take the cup out of the United States.

Every Canadian is proud of Sonerville's victory. He has demonstrated that Canada can produce golfers of championship calibre.

FALLING DOWN ON THE JOB

The Calgary Power Company Ltd. is falling down on the job of supplying good electric light and power service to its Bassano customers.

Within the past year the power service has failed a number of times causing discomfort and inconvenience to Bassano citizens and business men. The latest offense was last Saturday evening, when, during the busy shopping hours, the lights suddenly went out and stayed out for nearly half an hour.

Bassano people are getting "fed up" on this sort of thing. They have suffered similar experiences on a number of occasions, and they feel it is time the trouble was remedied.

Previous complaints have brought assurances from the power company that better service would be given, but last Saturday evening's experience was just a repetition of former experiences.

Bassano people are paying a fair price for their electric light and power, and they are entitled to good service. Mild complaints in the past have failed to bring a change for the better. It is time for vigorous protest. We are paying for good service, and the way to get it is to demand it.

ELECTIONS IN THE UNITED STATES

Election day in the United States was a great deal more than election day in Canada. For it is the "land of liberty and prohibition" the citizens of the great republic go to the polls to choose their president, senators, congressmen, judges, sheriffs, deputy sheriffs, clerks of the court, registers of deeds, poundkeepers, street scavengers, and sweepers of the temple.

The most remarkable feature of the American method of electing public officials is the unbounded faith the founders of the constitution must have had in the intelligence and ability of the electors to choose the best men for the many public offices.

Excellent as it may appear in theory, the American system does not work out very satisfactory in practice, for too much is expected of the elector, and the system is too susceptible to graft and corruption. It has been, within the past few years, the object of much criticism within the past few years by serious and sane thinking Americans. This is particularly true of the election of judges. The Canadian system of judgeship by appointment for lifetime is regarded as more conducive to the proper administration of justice.

The United States, one of the most progressive nations mechanically and industrially, is lagging behind in social reform. One of these days they will wake up.

THE CLOCK OF LIFE

The clock of life is wound but once.
And no man has the power
To tell just when the hands will stop—
At late or early hour.

Now is the only time you own;
Live, love, toil with a will;
Place no faith in tomorrow,
For the clock may then be still.

Women are not allowed to be employed as barmaids or as waitresses in places where alcoholic liquor is sold in Egypt.
Bentley made all of his geometric tabulations on a smooth surface of sand strewn over the floor of his home.

Two Englishmen were on the void when suddenly a native dashed out from among the bushes, pursuing for his life, and hotly pursued by a gigantic leopard.

"It's making a good race for it," remarked one of the Englishmen, "I've thought you can spot the winner."

"The winner is spotted," said the other, "the winner is spotted."

News of the Week

EXPLORER TELLS OF FOUR LARGED AMPHIBIAN FISH

COPENHAGEN, Sept. 22.—Lauris Koch, veteran Arctic explorer, today returned from Greenland with the claim that he had found evidence of one of the missing links in the chain of evolution—a four-legged fish that walked ashore.

RE-OCCUPATION OF GERMANY PROPOSED

PARIS, Sept. 22.—The occupation of the Rhineland by French troops was proposed in a newspaper article Saturday by Jean Fabry, member of the Chamber of Deputies, and the French reply to Germany's demand for equality in armaments.

"Germany has a religion of force," Deputy Fabry said, writing in the newspaper "L'Intransigeant," "but she respects force in others. There are two possible solutions for us—to re-occupy the Rhineland alone, at the risk of war, and to remain strong, stronger than Germany."

HOADLEY SAYS ALBERTA FARMERS STAND TO GAIN FROM CONFERENCE PACTS

EDMONTON, Sept. 17.—Alberta stands to gain substantially from the new economic pact agreed upon at the Imperial Conference in Ottawa, and particularly in respect to its agricultural industry, Hoadley, minister of agriculture, believes, but on condition that producers on the farm give increased and constant attention to quality standards.

The bacon industry in particular was considered by the minister as due for a big impetus from the new pact. Hoadley said he was especially on this score that he gave out a word of advice to Alberta producers to pay more attention to quality.

TOMLIN GOVERNMENT IN R. C. WILL CARRY ON

VICTORIA, B. C., Sept. 19.—Premier S. P. Tomlin will continue to govern in British Columbia with his present cabinet.

The Conservative leader, who earlier indicated a coalition government might be formed, issued a statement Saturday evening declaring he would carry on with his present cabinet to clean up pending matters, owing to the delay which would be caused public business if he were to reorganize his cabinet now and call an election.

\$100,000,000 DEFICIT IN CANADA REVENUE FORECAST

OTTAWA, Sept. 17.—As the year progresses it is becoming increasingly evident that the continuing problem facing the ministers of the Bennett administration is still the raising of sufficient revenue to satisfy the needs of the national budget. Notwithstanding a number of recent surpluses of an upturn in business conditions from now on, the federal treasury is still reported a slowly shrinking income.

The prospect is already that, in face of a balanced budget forecast by Hon. H. W. Rhodes, finance minister, at the last session of parliament, there will be a deficit of close to \$60,000,000 without any provision for unemployment relief or the C.N.R. deficit. These two latter items will probably raise the shortage to within the neighborhood of \$100,000,000.

CANADIAN WINS UNITED STATES GOLFING HONORS

Pine Farms Course, Baltimore Country Club, Sept. 18.—The amateur golf championship of the United States passed into Canadian hands yesterday for the first time in history as C. R. "Red" Sonerville, sleazebag, 29-year old shotmaker of London, Ontario, outplayed 23-year-old Johnny Goodman, of Omaha, Neb., to win the closest battle for this classic title in six years. Sonerville conquered Goodman 2 up and one to play, in a championship match that was featured by spectacular flights of scoring, punctuated with brilliant putting, and packed with enough championship moments to keep a gallery of 4,000 fans roaring right down to the finish on the 36th green.

Goodman is the man who beat Bobby Jones in the first fight of the championship tournament three years ago. In reaching the finals this year Goodman conquered two members of the American Walker cup team and defeated last year's champion in the semi-finals. But the sturdy Canadian lost too much for Goodman, for it was Sonerville's ability to come through the slushes that won him the championship.

LABOR CONGRESS PASSES MANY RESOLUTIONS

HAMILTON, Ont., Sept. 20.—With a definite program aimed at alleviation of unemployment and improvement of the lot of the working man delegates to the convention of the Trades and Labor Congress of Canada are en route to their homes today. More than 100 important resolutions have been endorsed and adopted, and will be laid before Canada's parliament when session opens next month.

Here is what labor wants: A system of contributory unemployment insurance. Immediate work on the St. Lawrence Waterways.

Swampstakes made legal. The sale of beer in public places. Repeal of section 98 of the criminal code, the famous "free speech" clause.

A 30-hour week on all government contracts, with the 40-hour week made general throughout Canada. Improvement in health conditions of workers.

Increased taxes on large incomes. Extension of moratorium acts to provinces where such acts are now in force, and the passing of such acts in other provinces.

And in addition, labor wants the immigration laws more strictly enforced, wants the government to refuse all offers for purchase of the Canadian National Railways, and wants, too, representation on the re-constructed railway board.

MUCH WHEAT IS GOING BY HUDSON BAY ROUTE

PRINCE ALBERT, Sask., Sept. 19.—Large quantities of wheat are being shipped by steady stream to Churchill from this district over the Hudson Bay railway and local interests are somewhat puzzled as to the reason. It is stated the Canadian National Railway agents are acting under a "mysterious blanket order" and are accepting wheat for shipment to Churchill as fast as it is offered by elevator companies.

The movement began Friday and as far as railway officials here know will continue indefinitely. It is believed the Dominion Government is making arrangements to fill the elevator at the Hudson Bay port for storage over the winter.

MAN WHO GROWS WORLDS BEST WHEAT DESERVES TO EAT GOOD BREAD

Dairy farmers are rightly subject to government inspection to ensure proper cleanliness and hygienic conditions in the production of milk and butter they sell to the public. Should not the public be equally protected against dirty methods of milling flour? is a question asked by the Robin Hood Mills Limited.

The western Canadian farmer supplies the world with the highest quality wheat. Surely the best bread in the world is what he and his family should eat. Surely the flour his good wife uses should be milled under perfect conditions from clean, pure wheat.

Robin Hood Mills have led the way in striving to the utmost to reduce their operating costs into line with a new era of lower price levels. But they have consistently refused to lower the quality or cleanliness of their products. Furthermore, they believe it to be their duty to bring to light certain startling facts about flour which many people "did not know before." So they have courageously borne the expense of a campaign of educational advertising. In the Bassano Mail and other leading farm journals and weekly newspapers of western Canada, these announcements will inform the people of the grainaries on these facts about flour which, in the public interest, should be widely known.

440 ALBERTA POOL ELEVATORS CAPACITY 17,000,000 BUSHELS

ALBERTA POOL TERMINAL CAPACITY 5,125,000 BUSHELS (3 Terminals leased 4,000,000 bushels capacity)

Alberta grain growers' money built this well-balanced system of elevators. It is their contribution towards the development of the grower-controlled producers' co-operative movement.

The support of Alberta grain growers is solicited in order to perpetuate and extend the usefulness of the Alberta Pool Elevator organization.

ALBERTA POOL ELEVATOR

GOVERNMENT PREDICTS 20 BUSHELS AVERAGE YIELD

EDMONTON, Sept. 17.—Threshing of Alberta's wheat crop is now well under way and making rapid progress under generally favorable weather conditions, according to the fortnightly crop report of the provincial department of agriculture.

After careful consideration of authority reports from all districts of the province, and checking of the yields revealed by the reports, it was possible to date the department of agriculture is of the opinion that the average yield of wheat over the province will be in the neighborhood of 20 bushels per acre.

TIME RIFE FOR WORLD RECOVERY, SAYS BRITISHER

MONTREAL, Sept. 19.—The present world situation has in it the seeds of genuine recovery. Whether they are permitted to germinate depends on circumstances that have yet to shape themselves.

This is the kernel of a conversation with Dr. Theodore Gregory, the famous British economist, just before he sailed for England on Saturday. This, he pointed out, is the third time in recent months that world business has had a chance of pulling itself out of the slough. The first, which arrived last summer, was destroyed by a wave of financial panic in Europe which quickly infected other continents. The second, which was also crippled by a banking panic, this time in the United States.

All this time, technical readjustments have been paying the way for revival. Production costs have been scaled down. The consumers' need of new goods has been damping out. But business has been lying, not on bottom, but somewhere down in the zone of dependency below the natural bottom of depression. It is confidence that has been lacking, more than actual recuperation power.

COLOMBIANS DEMAND WAR WITH PERU

BOGOTA, Colombia, Sept. 19.—Tens of thousands of Colombians clamored today for war with Peru, and went down into their pockets for cash and jewels to provide funds to finance it. The senate passed on second reading a bill authorizing the government to arrange a credit of \$10,000,000 for national defence.

The action followed a report on the nature of Sept. 3 by Peruvian citizens of the Colombian port of Letecia on the Amazon. Letecia was treaty to Colombia in the boundary treaty with Peru in 1922.

Reliability

Since it was established in Bassano a few years ago The Bassano Creamery has built up a reputation for reliability.

Our customers can depend on getting accurate weight and fair grading for their cream.

Ship to the nearest point and get satisfaction.
